

## WSUD District Engineer- Supplemental Questionnaire

The following supplemental questions are designed to gather information from applicants about their experiences and ability to perform the essential functions of the posted position.

Responses are evaluated to determine the candidates who are the most qualified for the position and these individuals are invited to an interview.

Provide responses to the following. If you do not have a response, enter N/A.

1. Do you possess a current, valid Professional Engineering (PE) registration from the State of Washington? If yes, also provide your PE type.
2. Provide a summary of your professional level engineering experience. Include years of experience and expand on those experiences which include any water, wastewater, or other public works related experiences.
3. Provide examples of your experience working with professional architecture/engineering firms to develop plans and specifications for projects and describe your role(s) in the development of the final plans.

4. Describe your experience with Washington State Public Works Procurement and Contracting requirements.

5. Describe your program management experience including tracking/ overseeing Capital Improvement Plans, projects, budgets, and managing the work of both in-house staff and outside consultants.

6. Describe any innovative approaches you have utilized in project management to overcome challenges that emerged during the course of a project, such as cost escalations, unexpected circumstances, or issues with third-party coordination.
